WHY CHILDCARE MATTERS TO BUSINESS

Today the majority of children live in homes where both parents are working. For today's workers (many of whom are parents of young children) access to affordable, high-quality childcare is a necessity—enabling them to stay in the workforce, be their most productive while at work, and continue to learn and gain the necessary skills to succeed in a rapidly changing world.

Quality care also prepares the workforce of tomorrow, forming the bedrock for future academic, economic, and social success. And businesses that support the care needs of their workers are able to better attract and retain talent and have a more productive workforce.

Finally, the public return on investment for our communities and country is extremely strong, with returns as high as \$16 for every \$1 spent. Just think of it as a strong and wise investment with returns in the form of reduced crime and incarceration rates, increased tax revenue, more effective public schools, improved personal and public health, and more educated, skilled workers. Who wouldn't want that?

The business community has an important role to play in propelling high-quality childcare to the top of the agenda when it comes to smart public and private investments to strengthen the workforce of today and tomorrow... We must seize this opportunity to use our voices, influence, and leadership to change the way American approaches childcare.
